## Summary

I am a 2nd year Ph.D. student. My research focus is GPU workload optimization and disaggregated data centers. I am seeking an internship opportunity in Summer, 2024 (May 27, 2024 to August 16, 2024). I am interested in getting opportunities to get more hands-on experience on how the industry manages HPC, and cloud environments.

## Education

### Rochester Institute of Technology

PH.D. IN COMPUTER SCIENCE

- **Research Topic** — High performance computing, distributed computing

Rochester, NY, USA

August, 2022 - Present

### Bangladesh University of Engineering and Technology

M.SC. IN COMPUTER SCIENCE

- **Thesis Title** — Transit Network Design For Evacuation Modeling Using Heuristic and Multi-Objective Optimization Based Approaches

Dhaka, Bangladesh

August, 2022

### Bangladesh University of Engineering and Technology

B.SC. IN COMPUTER SCIENCE

Dhaka, Bangladesh

September, 2017

## Experience

### Rochester Institute of Technology

GRADUATE TEACHING ASSISTANT

- Answering Student's queries about homework in office hours or in Discord

Rochester, NY, USA

August 2023 - December 2023

### Rochester Institute of Technology

GRADUATE RESEARCH ASSISTANT

- Investigate Research Problem
- Study and present research paper

Rochester, NY, USA

August 2023 - May 2023

### BJIT Ltd - Offshore Software Development Company

SENIOR SOFTWARE ENGINEER

- Act as representative of <5 member team.
- Provide initial system design based on client requirement as a representative of small team

House-7, Road-2/C, Block-J,

Baridhara, Dhaka

November 2020 - April 2022

### BJIT Ltd - Offshore Software Development Company

SOFTWARE ENGINEER

- Reviewed client expectations and project parameters and suggested software packages that met requirements.

House-7, Road-2/C, Block-J,

Baridhara, Dhaka

July 2018 - October 2020

## Professional Project Experience

### Device Interfacing Software Improvement

- Contributed to build and solve issues in building a codebase in **MSVC2019** which is earlier built using **MSVC2012** and clear documentation was not available
- Fixed bug in **C#** codebase and implemented a small feature

### Virtual Background Feature Implement

- Used google **mediapipe sdk** to implement library to remove background, add background, blur background (provided as a static library for Windows)
- Library is developed using **C++ (MSVC2017)** for 64bit platform, library using **mediapipe SDK** is partially built using **Bazel** build system.
- Resolved some build issues to build **mediapipe** code using **MSVC2017** (github provided version with the necessary feature can be built only by MSVC2019)

### Directshow Source Filter Development

- Repurposed code from existing MIT licensed project to create a source filter
- Analyzed requirement of our project and capabilities of directshow source filter to report what is feasible and accordingly influenced application architecture
- Implemented simple IPC mechanism to facilitate communication between COM component and application
- Worked on application backend to interface with custom source filter using **C++ (MSVC++14)** and **C#(.NET 4.7)**

### Device Control Based on Computer Vision

- Developed Windows application using **C++/CLR** and VS2015
- Developed simple custom solutions based on computer vision algorithms using **OpenCV** API to do particular object presence detection for application use case scenario and showed their effectiveness using client provided dataset
- Implemented object detection system in **C++** using **OpenVINO** sdk for **Windows10** based application
- Implemented relay control over tcp in **C++** using windows networking library and knowledge from the relay documentation

### Smartphone User Detection

- Collected Data and trained machine learning model inspired from a given paper in **Python3.6** using **numpy, scikit-learn** package
- Implemented simple communication over http protocol locally to connect front end code and backend ml inference using **flask, json** package

### Content Based http/https Traffic Filtering

- Implemented local cache in **C++** using **sqlite** library in **Windows** client PC(**Windows10**) application
- User can selectively filter categories of content
- Written simple **javascript** for browser based control panel of client PC application

## Used Tools

---

	<b>Languages</b>	Python3, C++, C, Java, Bash, SQL, C#, x86 Assembly(fasm)
<b>Machine Learning/Vision Development Tools</b>		OpenCV, Scikit-learn, Keras, PyTorch
	<b>DBMS</b>	MySQL, SQLite, PostgreSQL
	<b>Build system</b>	Make, CMake, Bazel
	<b>Cloud Environment</b>	GCP
	<b>CI/CD</b>	Gitlab CI/CD
	<b>Hypervisor system</b>	VirtualBox, Linux KVM
	<b>Container Deployment</b>	Docker
	<b>Cluster Management Toolkit</b>	xCAT
	<b>Mobile Platform SDK</b>	Android ( <a href="https://play.google.com/store/apps/details?id=com.bitweaver.morsetorch">https://play.google.com/store/apps/details?id=com.bitweaver.morsetorch</a> )
	<b>Network Tool</b>	Wireshark (monitoring), Packettracer (simulation), Postman (API testing)
	<b>WebFrameworks</b>	Laravel, Codeigniter
	<b>H/W Development Platform</b>	Arduino, Raspberry PI
